I am a professional metalsmith, designer and gemologist.

I have been mystified by jewelry for as long as I can remember. I collected antique jewelry treasures as a young child. Occasional trips to an intriguing local shop opened the door to a love of creating one of a kind jewelry pieces.

The selection of materials and techniques for my work, have a strong connection to my adoration of natural forms. I get excited about the contrasts of textures on metal surfaces. My work is primarily fabricated in silver and/or gold. I often embellish my work with unusual gem materials, for their amazing beauty and color.
